

Source of information: leaflet (note: the instructions might differ according to the brand of the acquired inhaler)

Unpack your inhaler

The inhaler comes with an aluminum seal that should be removed only when it is necessary to use the inhaler for the first time.

Using your inhaler

1  Unscrew the inhaler and remove it from the protective tube.

2  Press and release the brown cap, releasing the dose in the inhaler.

3  Exhale (but not into the inhaler).

4  Carefully place the mouthpiece in your mouth, close your lips.

5  and inhale strongly and deeply through your mouth. Do not chew or bite the mouthpiece.

6  Before exhaling, move the inhaler away from your mouth. Hold your breath for a few seconds.

7  Breathe out gently.

8  Replace the inhaler in the protective tube and turn it clockwise (from left to right) so that it is ready for the next utilization.
